

THIDAR AUNG

Bangkok, Thailand | 0958414016 | thidaraung00iii@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Recent ICT graduate with hands-on experience in software development, data analysis, and applied AI projects. Experienced with Python, TypeScript, FastAPI, PostgreSQL, and REST APIs through building and deploying full-stack applications and AI-powered automation.

SKILLS

Programming	Web & Backend	Data & AI	Database & Tools
- Python - JavaScript - TypeScript	- React - Next.js - FastAPI - REST APIs	- Pandas - Scikit-learn - Power BI - Gemini API	- PostgreSQL - Git & GitHub - Pytest - Codex - VS Code - Figma

EXPERIENCE

Front-End Developer Intern - Sprouting Tech	Aug 2025 - Dec 2025
- Developed frontend features across three client projects using React, Next.js, and TypeScript. - Collaborated with backend developers on REST API integration, troubleshooting, and resolving implementation issues. - Participated in testing, code reviews, requirement changes, and Agile production delivery.	
Team Leader - Rangsit University Language Center	2023-2025
- Supported 100+ students with digital services and academic inquiries while coordinating with university staff. - Coordinated team shifts, maintained documentation, and reported operational issues.	

EDUCATION

B.Sc. in Information and Communication Technology - Rangsit University, Thailand	2023-2025
GPA: 3.85	
Relevant Coursework: Machine Learning, Data Science, Data Warehouse and Data Mining, Database Systems, Data Structures and Algorithms, System Analysis and Design, Web Systems and Technologies, Object-Oriented Technology	

LANGUAGES

- Burmese (Native)
- English (Upper Intermediate)
- Thai (Improving)

PROJECTS

AI Customer Request Triage — AI Automation 2026

- Built and deployed a FastAPI automation using Gemini to classify customer requests, PostgreSQL to store validated results, and Slack to route high-priority requests.
- Added structured output validation, API-key authentication, bounded retries, Pytest testing, and a review-first Codex development workflow.

JobFlow AI - Full-Stack AI Application 2026

- Built and deployed a full-stack job application platform using Next.js, FastAPI, PostgreSQL, and REST APIs.
- Integrated Gemini for structured candidate-job match analysis, with validation, error handling, persistent AI results, and Pytest testing.

Tourist Spending Analysis - Random Forest - Academic Research 2025

- Integrated and preprocessed two tourism datasets using Python and developed a Random Forest classifier to analyze tourist spending behavior, achieving 75.57% cross-validation accuracy.
- Presented the research at an academic conference (ICTHM 2025).

Agent-Based Modeling of Student Productivity & Mental Health - Academic Research 2024

- Built a Python-based agent simulation as part of a team and analyzed outcomes over 800 time steps.
- Applied multivariate linear regression to evaluate long-term patterns ($R^2 = 0.4608$).
