PROFILE

Recent Graduate with a B.Sc in Information and Communication Technology from Rangsit University with GPA of 3.85. Experienced in front-end development with React and Next.js from a 4-month internship at Sprouting Tech, and skilled in data analysis and machine learning through academic research. Looking to apply strong technical foundations across web development, data, and AI/ML roles.

EXPERIENCE

Front-End Developer Intern - Sprouting Tech (Singapore)Aug 2025 - Dec 2025

- Developed responsive front-end interfaces for 3 client projects (clinic management, restaurant ordering, hotel booking) using React and Next.js within an Agile sprint workflow
- Built interactive UI components including sliders, carousels, and checkout/order-summary flows using Swiper.js and Tailwind CSS, translating Figma designs into production code
- Collaborated with designers and back-end developers, using GitHub for version control and ClickUp/Trello for sprint task tracking
- Participated in code reviews and iteratively refined components based on supervisor feedback, strengthening both technical and collaborative skills

Team Leader - Rangsit University Language Center2023-2025

- Supported over 100 students with digital services and academic inquiries
- Coordinated team shifts, managed documentation, and reported issues to staff
- Strengthened interpersonal and tech-related support skills

EDUCATION

B.Sc. in Information and Communication Technology - Rangsit University, Thailand2023-2026

GPA: 3.85

Relevant Coursework: Web Systems & Technologies, Object-Oriented Programming, Python Programming, Data Science, Database Systems, Data Structures & Algorithms, Machine Learning, Data Mining & Warehousing

SKILLS

Data & Analysis

Web Development

Tools

- Python
- SQL
- Excel
- Power BI
- Matplotlib
- Numpy
- Scikit-learn

- HTML
- CSS
- JavaScript
- React
- Next.js
- Tailwind CSS

- VS code
- Figma
- Git

PROJECTS	Tourist Spending Analysis - Random Forest - Academic Research	2024
	• Analyzed over 5,000 tourist records using Python and Excel to uncover spending trends and segments • Built a Random Forest model to predict spending levels and visualized findings with Matplotlib • Presented the work at an academic conference (ICTHM 2024)	
	Agent-Based Modeling Of Student Productivity & Mental Health - Academic Research	2024
	• Simulated student productivity and mental health using a Cognitive-Behavioral Resource Framework over 800 time steps • Validated outcomes with multivariate linear regression ($R^2 = 0.4608$), high-performance habits raised long-term productivity from 0.3 to 0.8	
	Personal Portfolio Website - Personal Project	Present
	• Designed and built a personal portfolio site using React, Vite, and Tailwind CSS • Implemented responsive layouts, accessible navigation, and custom UI animations
